

ABDC Asset Management System - User Guide

Introduction

Welcome to the **ABDC Asset Management System**, a comprehensive solution for tracking, managing, and reporting on your organization's fixed assets. This guide will help you navigate the application and utilize its features effectively.

1. Getting Started

Login

1. Open the application in your web browser.
 2. Enter your **Email Address** and **Password**.
 3. Click **Sign In** to access the dashboard.
 - *Default Admin Login (for initial setup):* `admin@abdc.com` / `password123`
-

2. Dashboard

The Dashboard provides a high-level overview of your asset portfolio.

- **Key Metrics:**
 - **Total Assets:** Number of assets currently in the register.
 - **Acquisition Value:** Total original cost of all assets.
 - **Net Book Value (NBV):** Current value after depreciation.
 - **Pending Approval:** Number of items awaiting action (e.g., transfers).
 - **Charts:**
 - **Asset by Category:** A pie chart showing the distribution of assets across different categories (e.g., IT Equipment, Furniture).
 - **Valuation Charts:** Bar charts showing total asset value broken down by **Location** or **Category** (slides automatically).
 - **Notifications:** Click the **Bell Icon** to view alerts for maintenance due, pending transfers, or newly registered assets.
-

3. Asset Management

Navigate to the **Asset Management** section to add, view, or manage assets.

Registering a New Asset

1. Click + **Register New Asset**.
2. **Step 1: Acquisition Details:**
 - Enter **Asset Name**, **Category**, **Cost**, **Acquisition Date**, **Vendor**, and **Invoice Number**.
 - *Note:* Ensure the Category matches the system settings.
3. **Step 2: Physical Details:**
 - Enter **Useful Life** (years).
 - Select **Location** and **Department/Unit**.
4. **Step 3: Custodian & Financial:**
 - Select **Asset Class** (General Purpose or Cluster).

- Assign a **Custodian** and **User** (if applicable).
 - Enter **Salvage Value** and select a **Depreciation Method** (default: Straight-Line).
5. Click **Complete Registration**. The system will generate a unique **Asset Tag ID** (e.g., ABDC/ABJ/ITE/2026/1234).

Bulk Upload

To add multiple assets at once:

1. Click **Switch to Bulk Upload Mode** on the registration screen.
2. Click **Download Template** to get the required Excel format.
3. Fill in the Excel sheet (do not change headers).
4. Upload the file. The system will validate rows and allow you to fix errors before saving.

Asset Lookup

- Use the search bar to find assets by **Name**, **Tag ID**, or **Category**.
 - Click on an asset to view its full details, history, and depreciation schedule.
 - **Print Tag**: On the asset detail page, click the **Print** icon to generate a printable Asset Tag with a QR code.
-

4. Work in Progress (WIP)

Track assets currently under construction or development (Capital Work in Progress).

Creating a Project

1. Go to **Work in Progress**.
2. Click **Create Project**.
3. Enter **Project Name**, **Final Asset Type**, **Location**, **Budget**, and **Project Manager**.

Managing Costs

1. Click on a project to view details.
2. Click + **Add Cost Item** to record expenses (Materials, Labor, Fees).
3. The system tracks **Budget vs. Actual** costs automatically.

Capitalization

Once a project is complete:

1. Open the project details.
 2. Review the **Total Capitalized Value**.
 3. Click **Register Asset**. This moves the item from WIP to the main **Asset Register** and generates an Asset Tag.
-

5. Reports

Generate detailed reports for audits and accounting.

1. Go to **Reports**.
2. Select a **Report Type**:
 - **Asset Register Summary**: Complete list with cost, accumulated depreciation, and NBV.
 - **Fixed Asset Schedule**: Summary changes (additions/disposals) by category.
 - **Depreciation Schedule**: Detailed depreciation calculations per asset.
 - **Transfer Report**: History of asset movements.

- **Disposal List:** Assets that have been sold, scrapped, or donated.
 - 3. **Filters:** Use filters to narrow down by **Category**, **Location**, ****Date Range**, or **Status** (Active/Disposed).
 - 4. **Export:** Click **Export to Excel** to download the report.
-

6. Administration

(Accessible only to System Admins)

Go to **Settings** > **Admin Settings** to manage reference data.

- **Departments/Units:** Add or edit departments (must be linked to a Location).
 - **Locations:** Manage physical locations (e.g., Abuja HQ, Lagos Branch).
 - **Custodians:** Maintain a list of responsible custodians.
 - **Categories & Asset Types:** Configure asset classifications.
 - **Fresh Start:** *Warning* - Use the "Clear all assets" button only if you need to wipe the database and start fresh (e.g., after testing).
-

7. AI Assistant

Click the **Gemini Assistant** chat bubble in the bottom corner to ask questions about your assets, such as:

- "Show me all laptops in Abuja."
- "What is the total value of furniture?"
- "Draft a maintenance email for asset #123."
